

Why Logon for Learning?

Logon for Learning Inc. is a nonprofit organization dedicated to helping schools manage the transformation necessary to improve student outcomes by embracing technology as the catalyst for change.

Our programs turn school communities into 21st century learning environments that connect teachers, students and parents to ensure that all are working together to help students achieve at higher levels.

We offer programs that support 21st century teaching and learning approaches that engage educators and young people by infusing technology in the educational process.

In addition, Logon for Learning offers a research-based signature program, called ON_DEC, an innovative, school change model that integrates technology into teaching and learning to improve student outcomes. This program has been in operation for over eight years, thanks to the generosity of the JPMorgan Chase Foundation.

"ON_DEC is a motivational roadmap to student success."
Administrator, Ditmas IS62

ON_DEC is already recognized as a successful program by:

***Inspiring leadership & change to create
21st century learning environments***

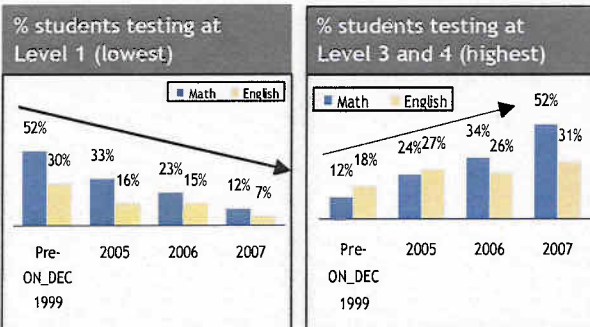

BACKGROUND

Since 2000 JPMorgan Chase has supported the development of "ON_DEC," (Our Neighborhood Digital Education Community) which gives teachers and students computers and training, and integrates computer use into the classroom as well as homes.

Logon for Learning was established based on the successful, long term implementation of the ON_DEC model in our demonstration schools. Our research, practice and collaboration with other non profits enable us now to offer the same opportunities for success in more schools.

Based on a Theory of Change

An independent research firm studied ON_DEC's demonstration school at IS 62 for three years. Findings show significant progress in students' academic performance, attendance, lowering of disciplinary incidences, increased parent involvement and higher motivation of students regarding their educational future.

Using the metric of student scores on standardized tests, Ditmas students demonstrate sharp decreases in lower performance levels and increases in students' reaching proficiency on annual assessments.

PROGRAMS & SERVICES

Logon for Learning through partnership with top educational & youth development organizations offers the following:

- ✓ Change management and leadership development
- ✓ PC Access for students/families at home
- ✓ Effective use of technology resources inside schools
- ✓ Provision for an onsite Help Desk
- ✓ Character education/recognition programs
- ✓ Online communities
- ✓ Linkage to instructional practices
- ✓ Extending the school day by maximizing the use of the computer at home
- ✓ Technology-based enrichment programs

Through professional development and training materials for school leaders, teachers, students and parents; along with support for technology implementation, data management tools, communication and other materials we will help schools transform into 21st century learning environments.

HOW WE ALL WORK TOGETHER

Creating digital communities full of opportunities.

We partner with an incredible group of organizations that have been providing support, programs and services to schools as part of their mission.

Logon for Learning brings all of these programs under one umbrella to make implementation at your school easier, more streamlined and with shared accountability for all of us to improve student outcomes.
